CONCLUSIONS

At March 2011 in SC the pattern of skills is broadly in line with SODC but rather less upscale than the separate statistics on the actually employed showed.

This data includes everyone of age 16-74, even if retired. Students are shown as students, even if they also do some work.

The mix of never worked/LT unemployed was lower than in the wider areas

The mix of "not classified" full-time students is lower than in other areas - see age profile. Sonning Common does not have tertiary education facilities.
